CLARESHOLM LOCAL NEWS

Miss Webb left on Monday for Lethbridge.

Miss Adda Peet is visiting Mrs. Gibson in Granum.

Harold Mulligan of Calgary is guest of N. Mulligan.

Born on March 1, to Mr. and Mrs. Geo. Fenton, a son.

Don't forget the masquerade dance on March 12th at Freeman Anderson's.

E. F. A. meeting will be held at the rest room Saturday, March 13th, at 3 p.m.

Mrs. Lola Barclay and little daughter Heryl left on Monday for Spokane.

Mrs. Dave Ramage and Rita Cockburn were shopping on Monday and Tuesday in Lethbridge.

Jackie Coogan in "The Rag Man" at the Rex theater Friday and Saturday nights this week.

Mr. Rennie of Stavelly has taken over the Clareholm Hotel. Mr. Garrard has moved back to his farm.

Mrs. J. F. Reynolds returned home on Tuesday after spending a week the guest of Mrs. Geo. Wilson in Lethbridge.

Mr. and Mrs. Nick Tattenger returned to Calgary on Monday after spending the week end with Mr. and Mrs. Harry Tattenger.

Miss Elsie Hoppe resumed her duties at the telephone office on March 1st, after working in the Lethbridge office for a few months.

The United Ladies' Aid will hold a St. Patrick's tea on Saturday, March 13th, in Harrison Hall, from 3 to 6. All will be welcome.

Everyone welcome at a masquerade dance at Freeman Anderson's on March 12th, under the auspices of the Starline C.F.W.A.—Secretary.

The Review is informed that Mrs. Jesse Strang had been very ill for seven weeks prior to her death, instead of a days as stated in last week's issue.

"The Pleasure Buyers," with Irene Rich and Clee Brock, coming to the Rex theater Monday and Tuesday next. From the story by Arthur Somers Roche.

While visiting at Granum last Sunday, Ruby Lewis, daughter of Mr. and Mrs. Sid Lewis, while at play with some of her young friends, had the misfortune to fall and break her collar bone.

The Clareholm U.F.W.A. is holding their annual afternoon tea on March 20th, in the rest room. Tea and coffee will be served from 3 to 6. Come and get a work apron to fit you—Free.

Ed. Schram, and T. W. Knight of Karmagang, will sell cattle, horses, farm machinery, etc., by public auction, at Wendelbo's Clarksmith shop by the Starline school, on Tuesday, March 16, at one o'clock. A. E. Kunious auctioneer.

Posters are out for the Elks' St. Patrick's Day dance and frolic, in the Old Fellows' Hall, Clareholm, on Wednesday night, March 17. Max Meloy's Dancers six piece orchestra will play, and a wonderful time is assured. Tickets may be obtained from any member of the lodge.

Another week of exceptionally mild weather has passed. Saturday last was very windy and dusty but the following four days were ideal May days, the mercury climbing to 65 in the shade on Wednesday. Thursday was blustery with snow flurries, which made it seem more like March, though it was not cold.

Fire was discovered in the roof of the Wilton Hotel on Monday forenoon. The fire brigade responded promptly to the call, and soon had the blaze under control. It had evidently started from an overheated flue. Fortunately no wind was blowing at the time. Had the wind been blowing like it did on Saturday last nothing could have saved a considerable number of business buildings in the block had the fire gained a little more headway before discovery other buildings would surely have been burned as well as the hotel. As it was the damage was comparatively light.

"The Folks Next Door"

St. Andrew's church was well filled on Wednesday evening when the Rev. Geo. Dickson, B.A., of Knox church, Calgary, gave his most entertaining and inspiring lecture on "The Folks Next Door." For over an hour the eloquent lecturer held his large audience with deepest interest, interspersing wit and wisdom with generous measure, swaying his audience with his sallies of wit, and then carrying home practical, wholesome truth to the hearts of all. The lecture proved to be not only highly entertaining, but a message of wholesome philosophy for every day living in personal, community, church, national, and international relations. Clareholm people will certainly welcome a return visit from Mr. Dickson.

Nazarene Young People Elect Officers

At the yearly meeting of the Young People of the Church of the Nazarene last Friday night the following officers were elected by ballot: Sunday school superintendent, Miss Lucella Staal; assistant superintendent, Miss Nola Smith; Secretary, Miss Martha Staal; treasurer, Mrs. A. Furzeuth.

Young People's Society: President, Mr. Chester Laing; vice president, Mrs. J. B. Humphreys; second vice president, Miss M. Valetsko; song leader, Phil Harding; assistant song leader, Miss Nettie Thompson.

Greenbank Sunday school: William Day, superintendent; Miss Teenie Fenton, secretary-treasurer.

Irene Rich Coming in Latest Mystery-Drama Sensation

Irene Rich, the Warner Bros. star, comes to the Rex theater next Monday and Tuesday in her latest picture, "The Pleasure Buyers," founded upon Arthur Somers Roche's novel that ran in the Cosmopolitan magazine.

The picture has been greeted in other cities as one of the most thrilling stories of many years. The solution is not the same as that in the original novel, but it is said to be even more effectively surprising.

NOTICE TO CREDITORS

In the Matter of the Estate of William Wilmot Duley and Lucy May Duley, Authorized Assignors.

Notice is hereby given that William Wilmot Duley and Lucy May Duley, both of the Town of Clareholm in the Province of Alberta, did on the 18th day of February A. D. 1926, make an authorized assignment of all his property for the benefit of his creditors and that Lawrence J. Clarke, Official Receiver, has appointed as the Custodian of the estate of the debtor until the creditors at their first meeting shall elect a trustee to administer the estate of the debtor.

Notice is further given that the first meeting of creditors in the above estate will be held at the office of the Official Receiver at the Court House in the City of Calgary on the 5th day of March A. D. 1926, at 3:30 o'clock in the afternoon.

To entitle you to vote thereat, proof of your claim must be lodged with the undersigned before the meeting is held.

Proxies to be used at the meeting must be lodged with the undersigned prior thereto.

And further take notice that if you have any claim against the debtor for which you are entitled to rank, proof of such claim must be filed with the undersigned within thirty days from the date of this notice for from and after the expiration of the time fixed by sub-section 8 of section 37 of the said Act we shall distribute the proceeds of the debtor's estate among the parties entitled thereto, having regard only to the claims of which we have then had notice.

Dated at Calgary, this 23rd day of February A. D. 1926.

D. A. ANDERSON

The Horse Breeding Industry In More Promising Condition Now Than For Many Years

"Credited loss in the horse-breeding industry are better and more promising than they have been for years," was the hopeful message given by Robert Thomas, of Grandview, president of the Saskatchewan Horse Breeders' Association, at the annual meeting at Saskatoon. Mr. Thomas said that there had been a far greater advance in the price of good horses than farmers who had rather bought nor sold horses realized. He had attended a recent horse sale at Saskatoon and believed that the prices of good horses averaged fully 60 more per head than prevailing prices a couple of years ago.

Speaking on the changing conditions in the horse industry in Canada, J. M. McCallum, chief of the markets division, livestock branch, said that Ontario is no longer the great supply center for horses, as breeding had fallen off very greatly in that province, and it is doubtful whether Ontario is supplying its own wants.

Figures for 1923 past three years showed shipments to Eastern Canada from the west amounted to over 10,000 horses in 1923; 17,412 in 1922; and 17,000 in 1921. Besides this, quite a number of western horses had found a market in British Columbia.

"The fact that some 80 horse breeding clubs in Canada have some 20 in Manitoba were operated last year indicates that the greatest activity in horse breeding in the Dominion is found in the prairie provinces," Mr. McCallum stated.

"Regarding the market for commercial horses, we are not sure of the fact that there is a profitable outlet for a few types, and that the farmer who is anxious to make a profit from his horse-breeding operations must study that market and direct his energies to producing only good kinds which are advantageously used on the farm, and for which, when offered for sale, there is a steady demand."

"Farmers will apparently continue to depend on horses for supplying farm power and breeders should raise horses with a view to supplying the city demand for good, big sound drafters, as big as it is possible to grow them, and to supply the demand both east and west for good big agricultural horses combining size, quality and activity."

"The return to the increased use of horses on the farms of Canada both west and east since the close of the great war to increase grain production is a fairly conclusive indication that the tractor and the motor truck are not going to soon displace with the use of horses."

Truck Farm In New York

Prisoners Work 600 Acres On Island In East River

New York City, not usually thought of as an agricultural community, has within its boundaries at least one good-sized truck farm. The farm is located on Riker's Island in the east river, and in a comparatively small compass of land it produces a large part of the food for the prison. The land on which the farm is located is the most part reforested by which the island has been increased from sixty-three to approximately 640 acres since its purchase by the city in 1858.

Tree Seed For Britain

Lodgepole Pine and Spruce Seed Being Sent From Alberta and B.C.

The seed extraction plant of the Dominion forestry department at Kamloops, British Columbia, is now working on an order for Canadian tree seed from Great Britain. Lodgepole pine and spruce seed is being prepared for the plant, while other varieties of tree seed will be prepared at the New Westminister plant. Spruce seed and 150 pounds of lodgepole pine seed will be prepared at the Alberta plant.

Industrial Winings

Further progress has been made in the industrial development campaign being carried on at Winnipeg. Private and industrial men interested in the construction of a sugar mill, woolen factory and a paper mill, and steel mill have been visitors to the city, and certain definite announcements from them are expected at an early date.

Our idea of an egghead is the man who thinks his wife ought to call him "cousin" just because he wears his hair with military brushes.

W. N. S. 1617

Clearing Old Farm Debts

Did Not Particularly Worry Saskatchewan Agriculture Last Season

"One of the biggest worries in the life of Mr. A. J. Averis, farmer, about as much as anything," says The Regina Leader. "In the question of paying up the current year's interest on the little old mortgage and perhaps a little bit of the principal."

"The fact that one of the worries of the Saskatchewan agriculturist during the present crop-year season is 'On the contrary many a farmer has filled the shed and reaped his harvest to such good purpose that not only has he been able this winter to pay his principal as well as overdo interest, but to wipe out his loan entirely. On some farmers the sun has shone so successfully during the past season that they are now purchasing the loan company to allow them to pay off instalments not yet due."

Alfalfa Growing Centre

Red Deer Valley In Alberta Is Leading Centre For Alfalfa on the Continent

The Red Deer River valley, in the alfalfa growing centre of the North American continent, is the leading agricultural district of Northwestern Minnesota, North Dakota and Manitoba gathered in convention at the River Falls, Minnesota. Peculiar soil conditions which prevent the "freezing out" of alfalfa define the territory for permanent alfalfa growing. Prof. J. R. Ellis, of the field husbandry department of the Manitoba Agricultural College, declared.

Surplus Farm Products

Total of Nearly Three Hundred Million Was Value of Surplus Products in Saskatchewan

On a very conservative estimate, the farmers of Saskatchewan would receive from the sale of their surplus farm products to 1925 a total of \$250,000,000, as compared with only \$195,000,000, or an increase of \$55,000,000 over the previous year, according to Premier Dunning. He further pointed out that the estimate was made on the basis of conservative data, and that in his opinion, would be nearer \$300,000,000 greater than the figure given.

Fox Farming In Alberta

Alberta is assuming importance as a fox farm centre. The industry has grown tremendously in this province in the last five years. D. W. Trotter, secretary of and one of the largest fox farms in the world, is the latest to start fox farming. He bought some of the winners at Vancouver show for his Calgary farm.

World's Largest Book

What is claimed to be the largest book in the world is being exhibited in a Dominican Church, Vienna. The volume dates from 1775, is of wood, and the pages, written in all 26 languages, weigh in at 100 pounds. It contains the names of all local Dominicans since 1410.

Maps For the Farmer

Their Value In Solving His Transportation Problems

"Topographical maps are extremely important and more into the daily life of Canadian citizens in all walks of life is evident by a recent example of the map of one of the maps to farmers."

A proposition was on foot to drain a large lake in Alberta and use the water for the production of hay. The question arose as to the cost of hauling hay to the nearest railway station, and the map was consulted regarding the distance and feasibility of opening up a road through new country. The contourness of the map itself was a hill interfering along the shortest route, and around a discussion as to the relative merits of hauling hay over or around the hill. In the latter case the road would be considerably longer, but steep grades would be eliminated.

The conclusion to be drawn from this example is that maps are not alone for the engineer, but that they are both readily intelligible and useful to all. The map in question was one of the sheets of the sectional map of Canada published by the topographical survey, department of the interior, Ottawa.

High Grade Western Coal

Claims Alberta Coal Is Equal To Anthracite

James R. Gouge, Alberta coal operator, told the engineering installation convention at Toronto, that Ontario would have no anthracite problem in five years. "You may think as you please about heat units," he said, "but you must bear in mind it is not a case of much of what is in coal, as what can be got out of it. The Alberta coal has every feature of an 'irragate'."

Mr. Gouge was replying to statements made by L. R. Thompson, of Montreal, regarding shipment of Alberta coal to Eastern Canada. Mr. Thompson had said that possibility of shipment of Alberta coal east, under present conditions, was more of a "political rallying cry" than a serious economic proposal.

Raymond Sugar Factory

Southern Alberta Stockmen Fattening Cattle and Stock at the Factory

Butt pulp from the sugar factory is being used as a basic feed for fattening stock, and from present indications, Raymond will develop a great stock feeding centre. All beef producers are hauling it daily and feeding to livestock. A number of prominent Southern Alberta stockmen are fattening cattle and sheep at the factory, and the Raymond School of Agriculture is undertaking extensive experiments with the pulp in the finishing of both cattle and sheep.

British Settlers Coming

One thousand British settlers are leaving the Old Country for Alberta, according to an announcement by the soldiers' settlement board.

Does Not Believe In Any Plan That Would Wipe Out Old Established Banking Systems

Violet Rays and Poultry

University of Wisconsin Claims Benefit Egg Production With Artificial Light

The ultra-violet ray, already employed profitably by medical men to heal human life, is being used at the University of Wisconsin to produce "more and better" eggs and chickens.

Nearly three times as many eggs can be produced by action of the rays the departments of agricultural, chemistry and poultry has found.

Heavier shells in irradiated pens also increased marketability of eggs and greater hatchability resulted. The ultra-violet light was found to cause fowls suffering from rickets. January 1, 1925, four groups of post-graduates were put on similar rations in identically arranged pens without natural light. The pens were artificially lighted during daylight hours.

Two groups were subjected to ultra-violet radiation. When the eggs were collected, it was found that the eggs were found in the irradiated pens as in the ordinarily lighted houses. The experiment began to increase markedly within eight days after ultra-violet light was applied.

Sanctuary In the Rockies

Jasper Park Is Largest Animal and Bird Reservation of Its Kind

The story of a remarkably increase in wild life in Jasper National Park, Alberta, under the policy of animal and bird conservation being pursued by the government, is told in a statement issued by Col. S. Maynard Rogers, superintendent of the park. Animals and birds which were unknown here a year ago are now taking up their abodes there and are flourishing even though the environment is entirely different to that in which they have been accustomed to live. As instances of this are given the presence of moose and prairie dogs.

Strong Appeal Against Any Hasty Action

In revolutionizing the present banking system, the speaker declared, "This is probably not exactly what you would expect me to say, but it is my honest opinion."

"Our attitude in improving the present system should not be one of revolution. We should make sure that any change we propose to make is logical, and then put them into effect by gradual stages."

The speaker somewhat surprised the audience when he said that he did not believe that the banks had deliberately set about in any way to do anything to wipe out the experience most of the bankers were doing their utmost to oblige the farmers and were giving loans consistent with the security available.

In his opening remarks Professor Fay described the difference between the present banking system, as it is, and outlined for the benefit of the audience the various systems of farm credit that had been established in some of the European countries, particularly Germany. He also described the system in vogue in the United States, and pointed out that it had been established along similar lines to those systems in Europe. It was impossible, however, to follow along the same line as in Europe, as conditions here were entirely different.

The speaker somewhat surprised the audience when he said that he did not believe that the banks had deliberately set about in any way to do anything to wipe out the experience most of the bankers were doing their utmost to oblige the farmers and were giving loans consistent with the security available.

Growth On Irrigated Land

Figures From United Irrigation Districts

The United Irrigation district in Alberta has completed its second year of actual operation and figures now obtainable show that irrigation is successful in materially increasing the yields of all grains and field crops. It is estimated that wheat grown on irrigated land will yield about 45 bushels an acre; wheat grown on spring-ploughed and irrigated, 20 to 25 bushels per acre; while wheat grown on unirrigated land will range between 10 to 20 bushels to the acre. Oats, barley and other grains show a corresponding increase in yields of irrigated areas.

The agricultural crops produced in the Canadian Pacific Irrigation district during 1925 had a value of \$2,675,720, representing the production of 15,085 bushels of wheat at an average price of \$25.75, an increase of 50 per cent over 1924.

Sugar Plant For Manitoba

Expected That a Big Plant Will Be Erected in 1926

As a result of negotiations which have been under way for some time, members of the Manitoba Industrial Development board state that they are confident of the erection of a sugar manufacturing plant during 1926. The board, in co-operation with the Agricultural College, has carried out successfully tests of growing sugar beets in 160 Manitoba plots. Analysis of the beets shows that the average sugar content is 15.44, with an apparent purity of 84.21 on a calculated tonnage per acre of 15.48.

Saskatchewan Watermelons

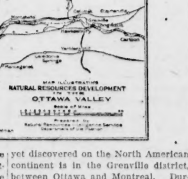

Very Fine Type of Bush Melon and Watermelon Grown in the Province

Experiments carried over a number of years by the Mowbray Brothers, Ardill, Saskatchewan, in the growing of selected seed and crossing one variety with another, has resulted in the production of a very fine type of watermelon and muskmelon, which can be grown successfully any season in this province. Experiments along this line have been carried out in the irrigated sections of Southern Alberta during recent years and have been comparatively successful.

B.C. Coal Industry

British Columbia producing approximately 100,000 tons of coal in 1925 than in 1924, according to figures compiled by the provincial mines department.

LETTER TO THE EDITOR

Editor Review-Advertiser.

Dear Sir—Please allow me to use your columns once more for a few words of reply, or comment, on Mr. Peirce's letter which appeared in your last issue.

Mr. Peirce's letter is somewhat ambiguously worded and does not clearly state whether he objects to the enactment of a milk bylaw or not. However, I might tell Mr. Peirce that in all properly regulated cities or towns such bylaws are in force, as they have been found necessary.

A good bylaw should provide punishment for the person or persons who either sell or serve impure or adulterated milk, hence the need of testing milk on the table as well as from the delivery wagon.

There is something wrong with the milk in Clareholm, so let us have the means of finding out where it is. No one but the producer, or public eating house keeper, should have any objections to this, and I'll take it for granted that Mr. Peirce does not object. We may find that too much of the cream from today's milk is taken off to decorate tomorrow's pie.

Enough said on this subject, Mr. Editor. I will now leave it to the town council and board of health to make the next move.

In concluding I might say that I have been highly complimented for taking this matter up.

Thanking you, Mr. Editor, for the use of your columns, I remain Yours truly

A. C. ROUNX

Card of Thanks

Jesse Strang and family wish to thank all the friends who so nobly assisted us during the illness and death of our loving wife and mother. We wish to thank in a special way the L. D. S. church in this district and the visiting members who assisted in the funeral services and burial. The floral offerings were greatly appreciated. We feel grateful for the regard shown by the very large attendance at the services.

Card of Thanks

Mrs. Florence Smith and I wish to express their thanks to all friends for the kindness and sympathy extended during the illness and death of their daughter and sister Edna, and especially to thank Mrs. Taylor and nurses at the hospital for their kindness; also to thank those who sent the many beautiful floral tributes.

Card of Thanks

We wish to take this opportunity of thanking our many friends and neighbors for their many acts of kindness shown during our recent sad bereavement, and also for the many beautiful floral tributes.

PRICE CHANGE

Introduction of the improved Ford closed models in colors has substantially increased the demand for these popular cars. In line with the policy to give its customers the benefit of all reductions in production costs, the Ford Motor Company of Canada, Limited announces substantial reductions in all closed models except the coupe. These reductions effective as of February 11th.

	New Price	Old Price	Reduction
Fordor	\$755	\$895	\$140
Tudor	695	755	60
*Chassis	325	335	10

Added refinements in the new model runabout, touring car and light delivery have necessitated a slight price increase. These prices are now as follows:

	New Price
*Runabout	\$410
*Touring	440
*Light Delivery	435

The truck chassis and coupe remain unchanged.

Coupe	\$665
*Truck	485

* Equipped with starter \$85.00 extra

Another PRICE Suggestion

Biscuits, Buns and Rolls

BISCUITS What de-light this word suggests. So tender they fairly melt in the mouth, and of such glorious flavor that the appetite is never satisfied. These are the kind of biscuits anyone can make with Dr. Price's Cream Baking Powder and these unusual recipes:

(All measurements for all materials are level.)

BISCUITS

2 cups flour
1 teaspoon salt
1/2 cup milk or half milk and half water

Sift together flour, baking powder and salt, add shortening and rub in very lightly; add liquid slowly to make soft dough; roll or pat out on floured board to about one-half inch in thickness (handle as little as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

CINNAMON BUNS

2 1/2 cups flour
1 teaspoon salt
4 tablespoons Dr. Price's Baking Powder
1/2 cup milk or half milk and half water

1 egg
1/2 cup sugar
1/2 cup butter
4 tablespoons instant rice

DR. PRICE'S

CREAM Baking Powder

Made from Cream of Tartar, derived from grapes. Pure, wholesome and unvarying in strength. Raises the dough perfectly.

MADE IN CANADA

Sift a tablespoon of measured sugar with flour, salt and baking powder, rub shortening in lightly; add beaten egg to water and add slowly. Roll out 1/8 inch thick on floured board; brush with melted butter; sprinkle with sugar, cinnamon and nuts. Roll as for jelly roll; cut into 1 1/2 inch pieces; place with cut edges up on well-greased pan, sprinkle with a little sugar and cinnamon. Bake in moderate oven 30 to 35 minutes; remove from pan at once.

PARKER HOUSE ROLLS

4 cups flour
1 teaspoon salt
4 tablespoons Dr. Price's Baking Powder
1 1/2 cups milk

Sift flour, salt and baking powder together. Add melted shortening to milk and add slowly to dry ingredients stirring until smooth. Knead lightly on floured board and roll out 1/8 inch thick. Cut with biscuit cutter. Cream each circle with back of knife one side of center. Butter the small section and fold larger part well over the small. Place one inch apart in greased pan. Allow to stand 15 minutes in warm place. Brush each with melted butter and bake in moderate oven 15 to 20 minutes.

ESTRAY

On Ole Billen's farm, N.W. 1/4 Sec. 10-12-27, one red heifer calf, with white hind feet, about one year old, no brand. Came to the above place about January 1st.

STRAYED

From Martin Miller's pasture, 1 two year old mare branded HS on left shoulder. Please notify H. Schuler, Phone 1208, Clareholm.

Wealth Production In The North

Salt Refinery Recently Established at Fort McMurray

Last week five cars of salt were trucked down from the inland, recently established at Ft. McMurray. Nine cars of fish also came in, making six cars shipped from the lakes served by the A. and C. W. The salt is the middle of last month. The reason that this section of the province is being brought into use, it is as rapidly as could be wished. For the trade of course is older than Edmonton, and the original cause of a trading post being located there. For many years a large sawmill in Edmonton has drawn its log supply from limits past the A. and C. W. The export of fish from the northern lakes is a well established business, one that makes a large item in the trade total for this district, and has done so for a number of years.

The establishment of the salt refinery marks the beginning of a new industry which must grow with the population of the whole prairie country and reach very large proportions eventually. As yet very little of the famous Athabasca asphalt is brought out, but the deposits are practically inexhaustible. The need for material for the streets and roads throughout the prairie provinces is large and increasing, and with a return of more prosperous times it will not be surprising if the railway handles more car loads than any other commodity. It is doubtful if such deposits are more than three hundred miles from any other city in Canada would so long have lain unused. This condition cannot continue indefinitely, and the day is not far off when the asphalt will be used to some extent, Edmonton Bulletin.

Winter-feeding Stock Turkeys

Light Feed of Scratch Grain in the Morning and Full Feed at Night

There is danger of turkey leg being becoming too fat when they are being overfed. Dependence, says Mr. Geo. Robertson, assistant bounty master, government inspectors should be placed largely on alfalfa or clover hay and scratch grain. The last mentioned should be fed sparingly and always in a deep litter so that the birds will have to work for all they eat. Crit, ether shell and either water or corn should be continuously available. As the turkeys are wanted approaches, the ration can be gradually increased until they are ready to be recommended for ordinary fowling. Regarding the latter, Mr. Robertson, in his bulletin on "Poultry Feeds and Feeding" which can be had at no cost on application to the publications branch, Ottawa, advises that breeders should be fed a most unsatisfactory ration that talk may be added to the mash by the addition of alfalfa meal to the mixture, and that a light feed of scratch grain be fed in the morning and a full feed at night. As breeding then approaches a little raw liver is added to the ration. The birds should be fed of live oil so that no harm to the laying birds. Green feed in variety is a necessity.

Franklin's Original Epithet

Has Been in Collection of Chicago Business Man For Twenty Years

Benjamin Franklin's original epithet has been kept hidden in the collection of a Chicago business man since his discovery twenty years ago was made public on the eve of Franklin's birthday.

The inscription differs in only a few words and punctuation marks from the widely known epithet of "Poor Richard." It follows:

"I follow: I am the creator of an old book. Its contents are: 'Poor Richard' and 'And Sir' of its lettering and gilt." It says: "I have lost for women. But the work shall not be wholly lost. For it will, as he believed, appear once more. In a new and more perfect edition. Current and approved by the Author."

Has a Real Grievance

Ona Kuhn, the millionaire philanthropist, said at a dinner in New York:

"The charges that our benevolent friends have been making for the money classes seemed to me of the former who complained to his wife:

"Don't talk to me about the rich. They're beggars. Here I spent two hard-earned weeks getting old Goba Goba's signature down past, and the very day I start out to give one of my checks the apocryphal old shunk goes and fails."—Chicago Daily News.

Neat to making minklets the next winter in the world to exist the mink of Alaska.

W. N. L. 1015

Britain's Great Naval Station

Portsmouth is Marvellous Sight in Sea First From Sea

To realize the marvels of Portsmouth, it must be seen first from the sea.

Coming in by St. Helen's, writes Herbert Vivian, we pass the close-hauled fleet of granite and steel, rising out of the waters between the east end of the Isle of Wight and Southsea Castle on the mainland. On the slopes of Portsmouth Hill stands the famous monument to Nelson, with the anchor of the Victory displayed on the granite base. As far as the eye can see, the whole place bristles with forts, towers and tiers and terraces of forts, all set out with the most wonderful regularity of modern science to guard the entrance to the first harbor in the world. The whole panorama is a vision of beauty, majesty and strength. It was here that the Grand Fleet assembled in August, 1914, waving Britain from invasion and appealing to the world to join in the fight for peace and pride. If once enemy ships could have broken through into the English Channel, Portsmouth would have been their first objective, perhaps their richest prize.

The entrance to Portsmouth Harbour is the narrowest in the world, the London Bridge, but has sufficient depth to permit battleships to enter at any state of tide, and five miles up stands old Portsmouth Castle, built by William the Conqueror.

Here the waters of the Thames, an extraordinary scene of intense and unending activity, whereby the trade of the world is carried on. The ships of the world are constantly on fire, and here today we are still confronted by a sight that deserves to be remembered among the wonders of Britain.

The main gateway is at the end of the harbour, known as Victoria Gate and Marlborough Gate. Passing through any of these, we behold a scene of such beauty and grandeur, that it is almost impossible to describe. The masonry is of the finest, the towers and battlements are of the most perfect. The water is of the deepest blue, and the sky is of the purest white. The whole scene is of such a nature that it is almost impossible to describe.

Plants Struggle For Existence

Vegetables Bend Roots Deep Into the Ground to Obtain Moisture

The plant struggle for existence and the lengths to which a lily root or pumpkin may go are made known by Prof. J. W. Weaver and Dr. Herbert C. Haines, who have conducted an exhaustive inquiry at Lincoln, Neb., into the private lives of these and other vegetables.

They made their findings public before the American Association for the Advancement of Science in their respective papers.

Plants such as beets, carrots, parsnips, and turnips frequently send their roots down to feet, and sometimes have discovered. The roots of pumpkins and squashes, often growing at the rate of 2 to 2 1/2 inches a day, are as far from the surface of the soil as the widely spreading vines, often fifteen to eighteen feet.

The lettuce at Lincoln is found to be thirty inches, its roots reaching depths of six to seven feet. The tap root of a half-grown beet was found to have shot downward five feet, the roots branching spreading three feet on all sides.

These sciences, in conjunction with the lengths to which a lily root or pumpkin may go are made known by Prof. J. W. Weaver and Dr. Herbert C. Haines, who have conducted an exhaustive inquiry at Lincoln, Neb., into the private lives of these and other vegetables.

Savings Deposits Increase

An increase of twenty-one millions in the total of savings deposits held by Canadian chartered banks during November last, is shown in the monthly statement. Deposits in the month of November last, were \$1,465,412, during the month. The amount of loan loans held in Canada showed an increase of approximately thirteen millions.

Automobiles in the United States were responsible for 19,000 deaths last year, and in England 3,000. The latter must be a very valuable and athletic race after all.—New York Judge.

Starting for heaven on a gravestone population is pretty thick business.

G.P.R. SATIN TIME TABLE DE LUXE

A beautiful service of the first, direct train service on the Canadian Pacific Railway between the West and East of Canada, under the 24-hour plan, has been received at headquarters of the system, set in by its originator, Geo. D. Somers, retired officer of the company, and now resident at Vancouver, B.C.

The form of a pocket time-table and is printed on satin with the date of the first train movement on the line, set on July 2, 1918. Since there were very few of these souvenirs printed, it is probable that this is the only one in existence at the present time.

Mr. Somers forty years ago, was

Summerfallow Substitutes

Corn Gives the Best Value as a Summerfallow Crop

For eight years the feasibility of growing an intensive crop instead of summerfallowing land before growing grain the following year has been under investigation at the Rothamsted, Alta., experimental station. The soil culture crops used were corn and potatoes. The latter gave the highest average, but the superintendent (Mr. W. H. Fairbairn) in his report says that the market for potatoes is too uncertain, and in dry years they grow so small, that they constitute a crop of doubtful value to raise on a large scale.

Corn has given the best value as a summerfallow substitute, the report states. It is possible to grow an early maturity variety for hogging off or a later variety for fodder or ensilage. If a farmer is growing corn he must prepare to cultivate it intensively, and the weeds which are the principal obstacle to overcome, are allowed to grow, as has been done in many of the fields of Southern Alberta, says Mr. Fairbairn, the crop cannot be considered as a summerfallow substitute; it is the most intensive crop, and its effect on the next year's crop. Yet another mistake that has been made in corn, according to the same authority, has been the planting of a late-maturing variety for fodder and then failing to harvest it before it becomes too rank for the stock to eat. Sunflowers and wheat in rows have been tested for three years, but neither has proved as satisfactory as corn.

Discover Ancient Fossil

Water Crack Believed to be Product of Millions of Years Ago

Experts of the University of Manitoba who have examined a fossil discovered at a depth of 25 feet in the Tynan quarry, Manitoba, estimate its age at 600,000 years.

The fossil, which is known as "Tribolium," is a long, narrow, water crack, something like a crab that crawls at the bottom of the huge sea that covered the entire millions of years ago, scientists say.

Alberta Will Tour Canada

It is learned at Vancouver that Field Marshal Viscount Allenby will begin a tour of Canada from Victoria on March 15, accompanied by Viscountess Allenby.

Lord and Lady Allenby will be the first of the British royal family to visit Canada. Several London advertisers have hired smart-looking guides to carry their automobile advertisements. They have attracted much attention from any man over his own car.

Henry Ford seems to have a passion for all things that things except the horse and buggy.

Sacrifice Of Mother Giraffe

Kills Helpless Young One To Save It From Hunters

Lieutenant Ottard, who returned recently to Paris from Central Africa with a collection of animals for the Jardin des Plantes, told how he had seen a mother giraffe kill her young one to prevent it falling into the hands of the hunters, says La Tribune, as translated for the Kansas City Star.

The lieutenant had surprised a herd of giraffes in a clearing near a Sudanese village, and the animals had taken flight, leaving one baby giraffe pressed into the hands of the hunters. For a mother giraffe to abandon her young is extremely unusual, and this was evidently a bit of carelessness on the mother's part, for the latter suddenly burst from the surrounding undergrowth and dashed back to relieve her child.

She seized the little giraffe by the neck just above the shoulders and started off, holding it at the full gallop. The long neck of the lieutenant's game attendant could not resist the temptation to fire, and the mother giraffe fell with her head mortally wounded. As the hunters drew near, however, the dying animal struggled to its feet, seized the baby by the neck and killed it with a single blow, as if a steel and released it.

The little one described a great parabola through the air and crashed to the ground, breaking all four of its legs. When the men reached it it was dead. The mother also perished.

How Big Is Your Vocabulary?

Ten Thousand Words Will Satisfice The Average Business Man

Dr. Frank H. Vizetelly says that the well-trained physician, minister or lawyer has a vocabulary larger than Shakespeare's. The hard of Avon used 25,000 words in his plays; the professional man must have 25,000 words. Ten thousand will suffice the average business man, while the average individual not especially educated, knows only 2,000. Dr. Vizetelly, in three of his books, notes 6,000 distinct terms. After a man knows more than 10,000 words, he knows something like a crab that crawls at the bottom of the huge sea that covered the entire millions of years ago, scientists say.

Three books of Wilson contained more than twice as many words as the plays of Shakespeare; the play will live long after the books are forgotten.—New Bedford Standard.

"Sandwich Girls" Now

The sandwich man, with his shaggy hair, matted clothing and disreputable shoes, once common. Several London advertisers have hired smart-looking guides to carry their automobile advertisements. They have attracted much attention from any man over his own car.

We are told the cat has also live and sends gift of money in vocal culture.

Women Better Able To Withstand Cold

Men Lose Out in Winter Tests Cold

That women can stand the cold better than men has been proved by lead tests made by the Royal Canadian Mounted Police. Choosing the present unusually cold spell with snow on the streets of Paris, they have made several tests on the Atlantic on the coast of Brittany. Women won all the tests.

Not being engaged in connection with any sporting event, they had no winter attention, but have proved that women can go into colder water and stay longer than men. This is due to the fact that the texture of their muscles, to a delicate layer of fat protecting the body and to a better circulation of blood, because of arteries being relatively larger in women than in men.

Miss Rose Nougaret went out into the Atlantic, swimming comfortably for fifteen minutes in water at the freezing point. It seemed to the men was able to stand more than a few minutes. The men came out blue with cold and with their teeth chattering while the woman was pink and exhilarated.

The swimming Hornet capitulated before his wife in the Stages. He had just won the Christmas swimming cap, but swimming beside his wife on an untimed course he gave up, while she swam still unaffected.

A slight hint of what was responsible. It was found also that he had been unable to throw a stone in breathing and swimming through the muscles through the circulation.

The tests were arranged because it had been noted during the mid-winter swimming competition that sixty women were exhausted by the cold, while none of the women contestants were affected.

Compass Widely Used

Never in World's History Has It Prevailed Of More Value

The invention of the compass is lost in the dawn of history. It is first mentioned in a quaint Chinese legend which relates that the first Emperor Hoang-ti in 2543 B.C. led his army and attacked the rebel King Chih of the plains of Khotan, the Khilang, getting the word of the conflict, called the wizards, magicians and soothsayers to his aid, who raised a great fog to hide Khilang and his army. Then the emperor, not to be outdone, used the greater magic of the compass, and his army, through the great fog so that he was able to overtake Khilang and capture him.

The compass appears to have been brought to Europe in the twelfth century, most probably by the Arabians, as it is known that the Arabian and Chinese traders met in the Persian Gulf, and on account of its very great practical value as a guide in all weather. It is said to have come into general use and enabled Christopher Columbus to sail straight west from Spain, by day and by night, through fair and stormy weather, to the discovery of the New World.

In spite of the fact that the compass is now used for nothing, it is today more widely employed than ever before; it is the sailor's guide, the explorer, surveyor, hunter, trapper, prospector, pioneer and traveler, penetrating the trackless forest, the highest mountain, the virgin wilderness and the Far North.

But the compass still has hidden secrets. It is said that the compass and stubborn state still act the part of highwaymen and hold up our friends the telegraph and wireless. We know these highwaymen are in the nature of first cousins to the dancing northern lights and magnetic storms, which are the cause of the black cyclonic sun spots that try to rob us of our light and heat; but all this is not the end of the matter. The compass is still a mystery, and scientists believe they never probably can be forced to take the stand and lay bare their hidden secrets until the direction of pointing of the compass has been properly mapped all over the world.

Yearly Loss Of Eight Millions

Value of Dishes Brought in Canada Every Twelve Months

Every mistress who once so often dismisses a maid in protest at her breakages—or every mother who says "I don't want to pay for my own dishes—may think their servants or their children are the most careless in the country. But the figures of Sir Henry Grey-Gerrard, M.P., in Toronto, on French pottery, were amazed at Professor Cretney's remarks at a close, for the figures on art treasures declared that no less than \$8,000,000 worth of crockery is broken in this country every year. It represents a loss that is practically not made in Canada. It means that this loss results in millions of dollars of crockery that is not replaced with more care.

Compactness Is Required

Actress Says Small Man Better Suited To Modern Living Quarters

In these days of small houses and cramped flats, it is not so much in demand as husbands as in the more spacious days of the Victorian era. At least Elinor Terris, among the leading English actresses, says she has made this discovery, and contends that the short, compact husband, is better suited to the new scheme of things in which brevity and compactness are so desirable. She feels she is completely to deliver an opinion on this subject, since her husband, Seymour Hicks, also well known on the London stage, is "beloved and beloved."

A need question had received its answer from one customer and the chief of the mail order department wrote: "I am sending you the goods, but what are you doing with all this space? Are you planning the whole country with peas?"

"No," came the answer, "we are not planning them at all; we use them for peas!"

How Russia Does It

In Russia, the House of Liberty, a Non-Union shipper at Leningrad reported to the authorities that the dock laborers working on his ship had been paid a higher wage than the Red Guards promptly appeared, drove the laborers back to their jobs, and kept them at work for several days without pay. There did not happen to be a delegation of British trade unionists on the spot at the moment.—London News-Victorian.

Singing and shouting before breakfast is recommended by a physician, who says it is a means of living a happy day. Yes, it is! It doesn't result in murder.

How And Why To Grow Alfalfa

Continues to Yield a Paying Crop Many Years

Summarizing the reasons given in a leader published in the 27th issue of the experimental farms detailing in brief the paragraphs why and how alfalfa should be grown in Canada, the reason for its being so highly valued is because it can be grown to every province, even as far north as Fort Vermilion in Northwest Alberta, because it continues to yield paying crops for many years; because the average yield of cured alfalfa hay for all Canada in ten years has been 2 1/2 tons per acre; because its palatability and feeding value as hay is equal if not superior to any other crop; because it carries a very high percentage of protein; because it can advantageously be used as silage or cut green as a soil crop; because it can be ground into a meal of excellent feeding value; because it makes an excellent pasture for horses, cattle and sheep; because it is a part of the deep-root system of alfalfa, besides extracting plant food from the subsoil and returning it to the surface. Alfalfa alfalfa roots, stems and leaves enrich the soil.

For the growth of alfalfa on land that is good fertility, do not use acid soil. In soil of much of Eastern Canada and the West, the soil is too acid. In the west, it is too rich; heavy Canadian grown seed, Grimm and Ontario varieties are the most available; so that the land is as free as possible from weeds; inoculation of the seed is necessary, the material "being obtainable from the National Bacteriological, central, experimental farm, Ottawa; fifteen to twenty pounds of good seed to the acre is generally sufficient in Canada, but in the prairie provinces considerably less will yield a good stand; seed either with or without a fertilizer will give a good stand. The best results are obtained when the soil has become well warmed, but before the dry period of the summer sets in. Do not pasture the stand of alfalfa the first year; alfalfa should go into winter with a foot of growth.

Women Better Able To Withstand Cold

Men Lose Out in Winter Tests Cold

That women can stand the cold better than men has been proved by lead tests made by the Royal Canadian Mounted Police. Choosing the present unusually cold spell with snow on the streets of Paris, they have made several tests on the Atlantic on the coast of Brittany. Women won all the tests.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not soaked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

The United Church

"The Buried Bible" will be the practical Gospel theme at the United Church next Sunday morning; an address of interest to our young people.

In the evening the pastor will continue the series of evening addresses on "Men who brought Jesus to the Cross," the subject for next Sunday evening being "Stephen, the High Priest," or Religion Goes Wrong.

The Sunday school meets at the close of the morning service, with classes for those of all ages.

The regular mid-week service will be held in St. Andrew's Hall on Wednesday evening at 8 o'clock. A hearty welcome for all.

Four Square Gospel

We preach Jesus Christ, and Him crucified.

Sunday, March 7th.

11 a.m. Communion service.

2:30 p.m. Sunday school and Bible class.

3:15 p.m. Evangelistic Subject, "And Benjamin."

7:30 p.m. Evangelistic Subject, "Life's Greatest Question."

Week nights, 8 o'clock:

Monday, Orchestra practice.

Tuesday, Young People.

Thursday, Evangelists.

Friday, Prayer meeting at Bro. Thoms.

Full salvation for body, soul and spirit. Rest for the weary, comfort for the sorrowing, clearing for the sinner, healing for the sick, power for the weak, are all to be found in Jesus. Bring your sick friends for the Great Physician to heal.

Good music and singing. Everybody welcome.

Nazarene Church Announcements

Young Peoples meeting, Friday night. Mr. Chester Laing, speaker.

Mrs. Geo. Ringrose will sing.

Saturday, 8 p.m., prayer band and healing service.

Sunday, 10:30 a.m., holiness meeting. Mr. Chester Laing will speak.

3 p.m. Rev. Tench will preach his farewell sermon at Greenback Sunday.

Sunday night at 7:30, a great evangelistic meeting. Subject, "The Unpardonable Sin." Is there a sin that God cannot forgive you for? Yes, there is. Come and hear what that sin is.

Come and worship with us and we will do you good.

Students to Visit France and England

LD Chateau Chillon, near Lausanne, on (2) Cathedral of Reims (3) The Bazaar of Montreal (4) The monument to the dead, "Aux Morts," one of the markets of the Paris La Vieille Cemetery in Paris.

L graduates of Canadian universities, a comprehensive tour through France has been arranged for this summer, starting in Quebec on May 26 with the departure of the Empress of Scotland, under the auspices of the French Government, the French universities and the Hon. Phillips Roy, commissioner-general of Canada in France.

This tour has been organized by the Hon. Mr. Justice E. F. R. Survee, president of the Canadian Association, in collaboration with Professor Bette du Rouse, director of the French summer school of McGill University. An entire month will be spent in France, at which time those who wish to do so may remain over and make extensions at their own expense, to England.

Arrangements have been made for the travellers to visit many ancient towns in "La Belle France." By motor car they go to the Chateau of the Loire and will also journey from Grenoble to Geneva via the Route des Alpes, in the same way. There will be an excursion on the Lake of Geneva where the famous Locarno Peace Treaty was brought to a successful termination through the genius of Sir Austen Chamberlain and his charming wife. A call to London is also included in the programme. In Paris there will be reception by French officials and they will continue to the attractive

entertainments of various kinds, as well as motor tours to Versailles and Fontainebleau.

Conducted by Justice Survee, the body of tourists, will arrive at Chateau de la Vieille, the Hon. Mr. Justice E. F. R. Survee, president of the Canadian Association, will return on the C.P. liner Melville.

Arriving at Chateau de la Vieille, the travellers will go to Bayeux, a quiet Norman town, famous in the world over for its ancient cathedral, which dates back to the Roman period. From there the students will go to Caen, where it situated the Church of St. Stephen, built by William the Conqueror.

Alençon and afterwards Tours, "The Garden City of France," are to be visited. Then the party is due to proceed to a few of the far-famed chateaux of the Loire. There are the Valençay, Chateau, Angoulême, Langeais, Laynes, Amboise and Chenonceaux, all steeped in historical lore and filled with beautiful objects of art and architecture.

At Poitiers, the tourists are to be welcomed a reception by the rector of the university, and from there they will continue to the attractive

commercial port of Bordeaux, where another reception is to be held by the university's rector. There is also a trip to Périgueux where is to be seen a remarkable imitation of the Basilica of St. Mark at Venice.

At Lyons, the second largest city in France and centre of the silk industry, the travellers are to be received by the university and by the city. While visiting Grenoble, in the valley of the Isère, a reception is to be given the party by the Syndicat d'Initiative and the university. The university of the French Chateau is to be visited on the way to Annecy.

The official tour is announced to end on July 3 so that the majority of the students should be back in Montreal on July 7, with the arrival of the Melville. Pamphlets are now being issued to those likely to be interested in the trip, but the announcement has aroused such interest that many inquiries have already been received at Canadian Pacific headquarters in Montreal from students in all parts of the Dominion. It is understood that McGill University will be well represented.

Piano, Organ, Harmony and Conducting.

A FINE BATHROOM

Modern fixtures have another advantage—they are easier to keep clean than the old-fashioned kind. Those beautiful, smooth white surfaces can be kept in a glossy condition with very little care—and there are no difficult corners where only an acrolat could hope to clean successfully. Drop in and see our display of bathroom fixtures.

Farm Help!

British Boys for Mixed Farms

Farmers of Clareholm District who are operating mixed farms and require help for milking, feeding stock and general chores, as well as for field work and teaming, are hereby advised that such help is available from the

CLASS OF BRITISH BOYS

which has been in training since October last at the

SCHOOL OF AGRICULTURE, CLARESHOLM.

These boys are strong, husky fellows who are willing to work, and ambitious to become farmers when fully experienced.

Conditions of Employment—The Provincial Department of Agriculture will place these boys on mixed farms one full year, where they will have good homes and an interest taken in their progress.

They will be available after March 1st, and all will be placed by March 15th.

They will commence at a nominal wage, to be increased in proportion to services rendered.

Farmers who want help of this kind will apply to the School of Agriculture, Clareholm, Alta., without delay.

S. H. GANDIER, Principal.
